

Responses from our survey:

Problems of CRVS-Banbeis website:

- Website is too slow (every page takes too much time to be saved).
- Problem with editing.
- Very large documents to manually enter.
- Can't do more than 4/5 response in one sitting.
- Without both parents NID & students Birth Registration (if not online) the info can't be uploaded.

Feedback of our website's Mock-UI:

- Direct Camera Option for taking photos & scanning documents.
- Search bar should have the option to filter out by classroom.

Changes made after the feedback:

- As we are not developing a mobile app, the first feedback is not feasible to implement.
- We added a new filter in the search bar named "By my classroom".
